Pension Management System

Introduction

The purpose of this program is to develop a system that would keep records of employees or pensioners data including their pension plan, allowances, gratuity, taxes, net pay, rent pay and also calculate the pay of the pensioners taking into consideration the employees/pensioner's data.

Some features of the software

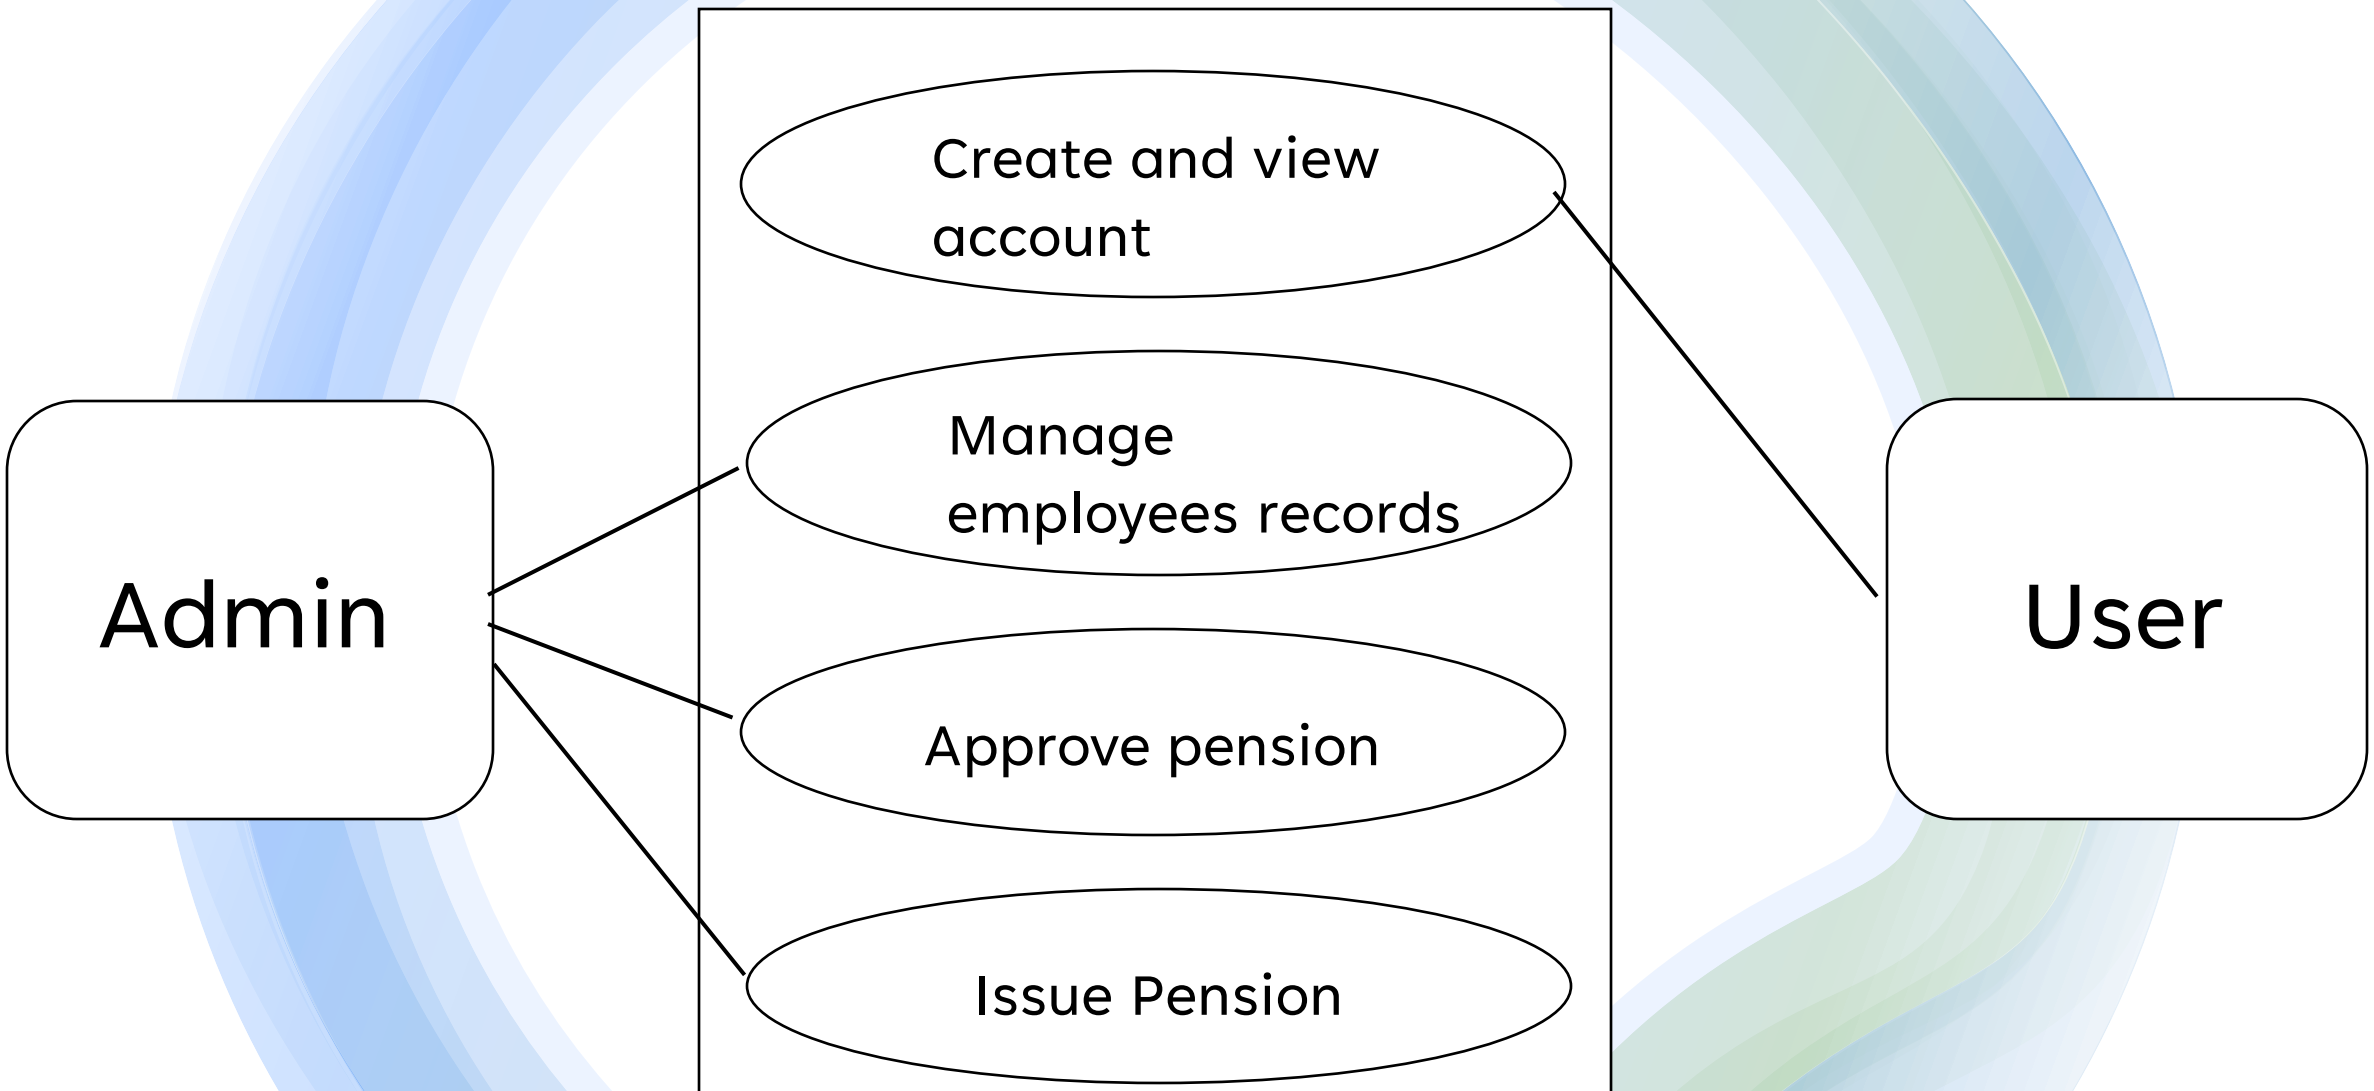
1. Add/Edit/Delete Employee Records
2. View Employee Records
3. Search Records
4. Calculate Pension

Admin

The admin can add and edit employee information as well as communicating with the employee and answering their queries.

User

The user can create and check their records and communicate with the admin directly.



Admin
Create and view account
Manage employees records
